Abuse Inside the Polish Patent Office (UPRP) - Part I: It's a Lot Like the EPO

So what is this all about?

Well, it's about corruption and misuse of the Office for political and financial gain (at whose expense?), much like at the EPO.

"The special issue of StoWI Quarterly (1A/2025)," as someone put it, "is an investigative report embellished with photographs and questions, exposing systemic dysfunction within the Polish Patent Office (UPRP) during the presidency of Edyta DEMBY-SIWEK (2019–2024). It documents serious administrative abuses, lack of managerial competence, and persistent failure to fulfill legal obligations in the field of industrial property protection."

/.../

They basically take advantage of actual scientists (whose life they ruin) for purposes other than advancing the sciences. /.../

Abuse Inside the Polish Patent Office (UPRP) - Part II: Turning a Once-Respected Patent Office Into a Circus and Laughing Stock

What happens in UPRP represents what happens in **many other places worldwide**, including across the EU and in the EPO.

/.../ patent "*clerks*" (or **examiners**) are overworked and the mission changed. Once championed as masters of their respective sciences or disciplines, they're now being treated like machines and sometimes get replaced by them.

/.../ the misuse of public funds for so-called "*integration picnics*" held during working hours.

/.../ symbolising a **collapse in morale and institu**

posted by Roy Schestowitz on Jun 06, 2025

Abuse Inside the Polish Patent Office (UPRP) - Part III: Data Protection Failures, Just Like at the European Patent Office (EPO)

Justyn Łojko

/.../ Whenever EPO management spoke of "*privacy*" or "*data protection*" it basically meant reasons to silence staff which spoke about wrongdoing. /.../

Despite serving as Director of the IT Department since 2020, Justyn Łojko failed to implement effective data security measures.

The report notes operational lapses such as non-transparent data processing systems, delays in publishing information, and vulnerabilities potentially affecting the privacy of UPRP staff.

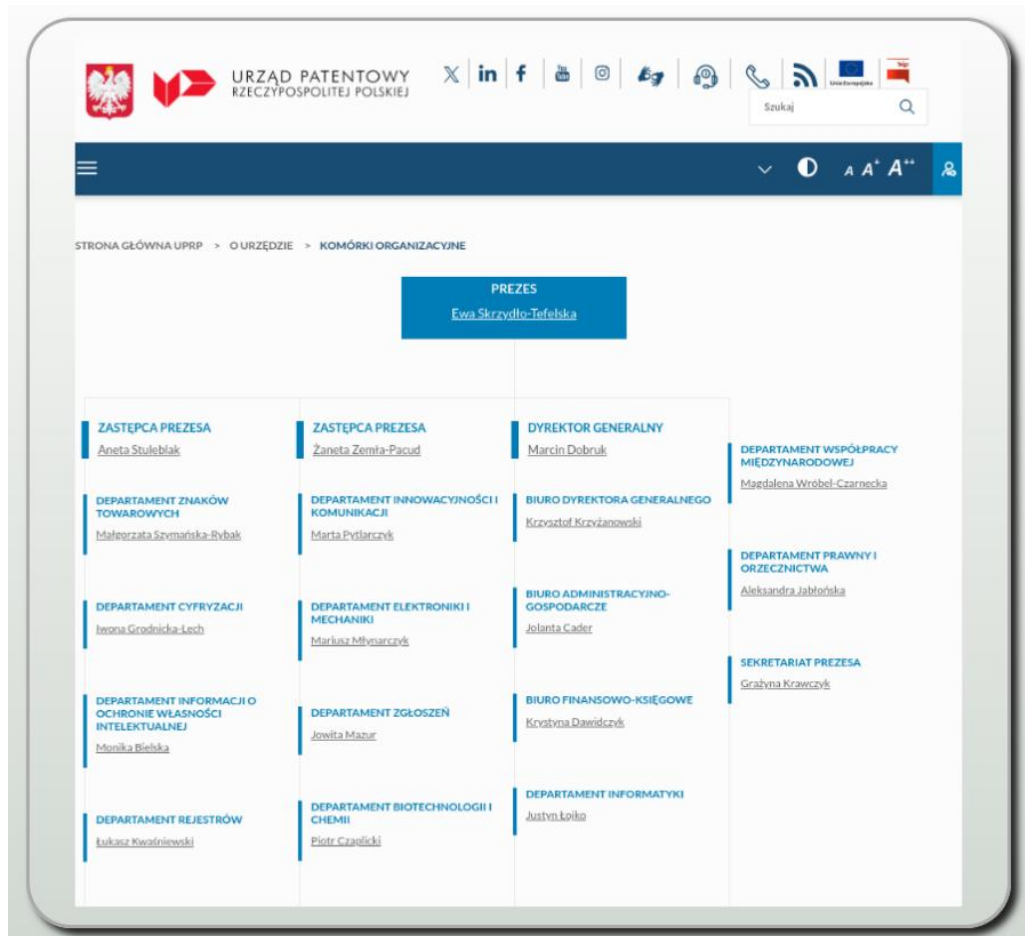

/.../ Of course the people who did this weren't held accountable. /.../. They're above the law. They assume that they themselves are "*the law*" and anyone who speaks about them is "*breaking the law*".

IV

[https://techrights.org/n/2025/06/07/Abuse Inside the Polish Patent Office UPRP Part IV Political Sc.shtml](https://techrights.org/n/2025/06/07/Abuse%20Inside%20the%20Polish%20Patent%20Office%20UPRP%20Part%20IV%20Political%20Sc.shtml) posted by Roy Schestowitz on Jun 07, 2025

Abuse Inside the Polish Patent Office (UPRP) - Part IV: Political Scrutiny and Errors/Inconsistencies in Official Documents

When such organisations receive scrutiny they start focusing on cover-up and muzzling of facts (or crushing people who say the truth)

There are now officials at UPRP who distort facts or lie. /.../ errors in official documents, inconsistencies between official reports submitted to the Ministry of Development and annual UPRP reports, the refusal to conduct remote hearings, and the absence of recording access—all of which prompted 130 MPs to file formal

Abuse Inside the Polish Patent Office (UPRP) - Part VI: Political Stunts by Former President

Where jobs are notorious as bribes or tenures "rewarded" for complicity in illegal things

/.../ institutions meant to deal with science and technology became **political hubs**, instead. Social climbers, who are sometimes sociopathic, are attracted to that like magnets. They need not care about or even understand science; what matters to them is... **power**. Just for power's sake. With power comes money, respect etc.

Scientists? To them those are just "*props*" - people to trample over.

/.../ involves the use of public funds to build former President Edyta Demby-Siwiek's "*personal brand*" while neglecting fundamental matters.

The former President of the UPRP has been promoted and is now Deputy Executive Director of EUIPO. The report further criticizes unprofessional public behavior - such as holiday greeting videos and dressing in costumes - deemed harmful to the credibility of the public institution at the European level.

/.../ it's like a money-laundering operation where one politician rewards another at taxpayers' expense:

Way to discredit and thus destabilise the EU. /.../

It does not seem to matter if UPRP becomes rubbish, workers are impoverished etc. The person responsible has moved on to "Europejskiej ds. Własności Intelektualnej (EUIPO)."

Has UPRP been reduced to a personal springboard?

Abuse Inside the Polish Patent Office (UPRP) - Part VIII: Illegal Working Conditions

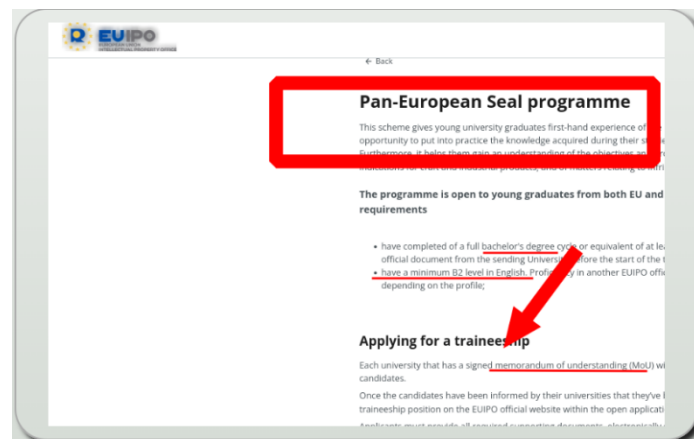

Why do honest people suffer, whereas **corrupt people** get ahead /.../

IX

[https://techrights.org/n/2025/06/12/Abuse Inside the Polish Patent Office UPRP Part IX Minimum Wage.shtml](https://techrights.org/n/2025/06/12/Abuse%20Inside%20the%20Polish%20Patent%20Office%20UPRP%20Part%20IX%20Minimum%20Wage.shtml) posted by Roy Schestowitz on Jun 12, 2025, updated Jun 12, 2025

Abuse Inside the Polish Patent Office (UPRP) - Part IX: Minimum Wages For You (Experienced Scientist), Alicante/EU Paydays For Me (Unproductive, Corrupt Official)

*Does UPRP **maladministration** extend to the false belief that qualified and experienced scientists can play the role of circus clowns?*

They're devaluing the workers and cheapening everything - to the point where there is no incentive to improve science and technology and instead they're protecting existing monopolists, shielding them from competition using an ocean of low-quality, garbage "patents".
